

Nxx Series Aluminum Protective Screens

Brief Introduction:

NxB series aluminum protective screens prevent stray or unwanted light from entering or exiting an experimental setup. The aluminum is treated prior to anodization to create a homogeneously diffusive surface. So it may also using in the holographic imaging screen. We also have the aluminum protective screen with scales, the min reading scale is 1mm

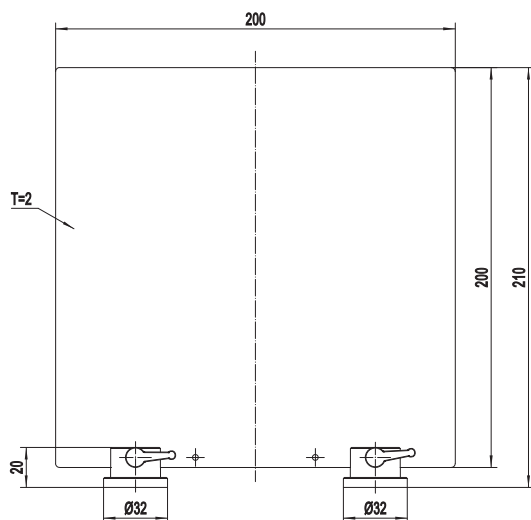

Features:

- Aluminium alloy, surface treated by black anodic oxidation or matte treatment in white
- Easy to use
- With magnet in the seat. easy to mount on the optical table

Note: There is still risk of the scattered high power laser enter eyes, please take on your laser goggles.

Dimensions:

NBB200(Black)/NWB200(White)

NHR200
